

NextEra Energy Resources

A World Leader in Renewable Energy

Long before clean energy became a popular choice in America, NextEra Energy Resources has been leading the way in generating electricity from renewable fuels.

Renewable energy helps meet the climate change challenge and provides important diversity to the nation's energy mix.

No. 1 in Wind Energy

NextEra Energy Resources is the largest owner and operator of wind generating facilities in North America:

- » 65 wind facilities (more than 8,200 turbines) in operation in 16 states and Canada.
- » For the seventh year in the last eight, added more megawatts to its wind portfolio than any other developer in the nation.

The Most Power from the Sun

NextEra Energy Resources is the largest generator of solar thermal power in the country:

- » Co-owns and operates seven solar plants in California's Mojave Desert, collectively known as the world's largest solar site.
- » Operates 310 megawatts of solar power, which is capable of meeting the energy needs of about 230,000 homes.

A Leader in Hydro Power

NextEra Energy Resources is a leading producer of hydroelectric power:

- » 81 units at in Maine totaling approximately 360 megawatts of renewable energy.
- » Our Maine hydro facilities generate enough electricity to meet the needs of about 330,000 households.

About NextEra Energy Resources

- » North America's largest producer of wind and solar power
- » Operations in 25 States and Canada
- » Nearly 17,000 net megawatts of generating capacity
- » 2008 adjusted earnings of \$821 million
- » Creator of the widely recognized EarthEra™ program

Expanding Transmission Facilities

NextEra Energy Resources is also in the business of developing transmission to carry power from remote locations to population centers that rely on energy:

- » NextEra Energy Resources owns various transmission lines across the country and is pursuing additional

large-scale opportunities to develop, build and operate new transmission facilities.

- » The Public Utility Commission of Texas recently awarded Lone Star Transmission, an FPL Group subsidiary, a large transmission project as part of the state's Competitive Renewable Energy Zone process.

Introducing Our Latest Innovation: EarthEra™

NextEra Energy Resources is joining forces with American businesses to change our energy future! Through the innovative EarthEra program, organizations purchase EarthEra renewable energy and carbon offset products and every penny of revenue is used to build more wind and solar power facilities across the nation. To date, over \$18 million dollars has been committed to the Trust. 100% of these funds will be used to build new renewable energy facilities.

Marketing Wholesale Energy

NextEra Energy Power Marketing, LLC buys and sells wholesale energy commodities; manages all fuel needs of NextEra Energy Resources' power generation fleet; and markets the output to customers across the country.

- » Again in 2008, Platts, a leading industry publication, ranked NextEra Energy Power Marketing as one of the top 10 power marketers.
- » NextEra Energy Power Marketing markets the largest renewable energy portfolio in the country.
- » NextEra Energy Power Marketing is able to provide custom renewable energy solutions for customers with specific needs, from meeting regulatory mandates to working with businesses to meet their goals on renewable energy generation and carbon emissions management.

responsible manner.

- » NextEra Energy Resources wind facilities enabled customers who purchased renewable attributes to reduce the following amounts of 2008 emissions that otherwise would have been released into the atmosphere:
 - » Nearly 13 million tons of carbon dioxide
 - » More than 30,000 tons of sulfur dioxide
 - » More than 19,000 tons of nitrogen oxides

Environmental Excellence

A common element throughout all NextEra Energy Resources operations is a commitment to environmental excellence.

- » NextEra Energy Resources incorporates environmental stewardship into the design, construction, operation and maintenance of its facilities.
- » Company leadership also is committed to ensuring that the growing demand for power is met in the most environmentally
