Community Connections

The Joinery has an eye on the future in more ways than one. Not only does more than 75% of the wood we use come from responsibly managed forests, we are now onboard for 100% clean wind power. As of May 2005, The Joinery made the switch from the previous partial clean wind energy package to 100% clean wind power. We've now joined over 35,000 others in Oregon who are contributing to the future of renewable energy, and only a handful that have gone to 100%.

Our Meals on Wheels routes are still going strong. The Joinery supports two weekly routes in our community. Builder Ken Vetterick is always wearing a smile when he returns from his route. Also worth mentioning is the BlueWorks Business award that we received from the City of Portland's Office of Sustainable Development for our continued recycling efforts. We are involved in the health of our community and making a difference; we're proud of it.

Help us send help to Katrina's victims.

We were moved by the suffering of the victims of Hurricane Katrina and would like to invite you to join us in doing something to help. **A portion of all our proceeds during the month of October will be donated to Northwest Medical Teams** who have rushed to provide relief to the stricken people of America's Gulf Coast. If you're planning a purchase from The Joinery, October is the time to do it. Come in and join our relief effort.

Thank you.

The Joinery Receives National Green Power Leadership Award

On Monday September 14th, The Joinery received a Green Power Leadership award in Atlanta, Georgia from the [U.S. Environmental Protection Agency \(EPA\)](#), the [U.S. Department of Energy \(DOE\)](#), and [Center for Resource Solutions \(CRS\)](#). Cassandra Jackson, Director of Marketing, flew to Atlanta to represent The Joinery at the [Renewable Energy Market Awards Ceremony](#) earlier this week. This national award recognized the actions of individuals, companies and organizations that are significantly advancing the development of renewable electricity sources through green power markets. To be recognized as a leader for small businesses around the country is very exciting.

To learn more about the awards visit our [media page](#).

Customer Profile: The Joinery

Sept. 2003

Earlier this year, The Joinery became a renewable energy leader by signing on as Patron-level supporter of PGE's Clean Wind™ product for medium to large businesses. The Joinery designs, builds and delivers custom hardwood furniture, gifts and accessories, with one of the largest gallery/showrooms of handcrafted hardwood furniture in the Pacific Northwest.

As a Patron, The Joinery has made a financial commitment to renewable power. Renewable Report spoke with The Joinery's Marc Gaudin, Head Slacker/Founder, about the company's participation in the program. For more information about The Joinery, visit www.thejoinery.com.

Why did The Joinery choose to support renewable power?

We support renewable power because it's every company's responsibility to be good stewards of the earth. Any way we can do this makes us feel better.

In what other ways does The Joinery support sustainability and the environment?

Over 75 percent of what we build is made of certified sustainable wood. Certified sustainable lumber comes from a management philosophy that recognizes and respects the values and benefits of the forest. It means maintaining the forest's total ecological integrity and minimizing the impact of harvesting.

Recycling is also vigorously encouraged and facilitated. We use recycled and/or reusable materials extensively in our day-to-day operations.

THE FOLLOWING CUSTOMERS FOR CHOOSING CLEAN, RENEWABLE ENERGY.

Clean Wind™ provides your organization with a simple way to demonstrate your concern for the environment and commitment to renewable energy in Oregon. We have more than 52,000 customers who purchase renewable power from PGE and look to local businesses as leaders in the effort to help keep Oregon clean.

Power Pioneers Industry leaders who support Clean Wind™ renewable power

The Joinery signs on for 100% renewable power.

With a motto of "Building Tomorrow's Antiques Today," it is obvious that The Joinery has an eye on the future. The maker of fine hand-crafted furniture uses more than 75 percent certified sustainable wood as a standard business practice, and was one of the first companies to sign up for renewable power.

In 2005, The Joinery committed to match 100 percent of their total electrical usage with Clean Wind power.

"At The Joinery, empowering our employees while having integrity in all facets of business and being good stewards to our environment, community and customers only makes sense," says Marc Gaudin, The Joinery's founder. "Having access to PGE's Clean Wind program is another opportunity to help us reach those goals."

PGE recognizes The Joinery as a leader in environmental stewardship and for their support of renewable power. Visit them on the Web at www.thejoinery.com.

Your organization has the power to make a difference. Clean Wind is 100 percent new wind power from wind farms in the Northwest, and is an easy, affordable way to support renewable energy. Portland General Electric helps publicize your commitment to the environment with a variety of publicity, award and recognition benefits. Help build a brighter tomorrow by signing up for Clean Wind today. Contact your PGE customer manager, send an e-mail message to renewables@pge.com or visit PortlandGeneral.biz/CleanWind for more information.

PGE's online news

News article on customer award as one of main focuses for one month in 2009.

Includes links to our website.

The screenshot shows a news article page from PGE's website. At the top, there is a banner image of wind turbines in a field with the text "greenpoweroregon" overlaid. Below the banner, there is a search bar and a "SEARCH" button. To the right of the search bar are links for "Share", "Print", and "Sign Up For Renewable Energy". The main content area features a breadcrumb trail: "Home > News > News Article". The article title is "The latest news on renewable energy and sustainability". Below the title is a sub-headline: "EPA recognizes Intel, The Joinery for renewable power support". The article is dated "15 Sep 2009" and written by "PGE". The text of the article states: "Two PGE renewable power customers, Intel and The Joinery, have been recognized for their support of renewable energy by the Environmental Protection Agency. Intel was singled out as a Green Power Partner of the year and The Joinery was also recognized." It also includes a link to "Read a full list of award recipients and learn more about the awards." and a "back to news" link. At the bottom right, there is a logo for "Portland General Electric".
